

San Antonio, Texas, USA
July 27, 2020

Dear Prospective Respondent,

We are excited to make you aware of our Request for Information for the **FlexPOWER** Bundle which includes opportunities for solar power, battery solutions, and an all-resource approach to firming capacity solutions.

The **FlexPOWER** Bundle is a major step forward in our **Flexible Path** strategy to thoughtfully discover, explore and implement new power generation and demand side solutions. The **Flexible Path** is our over-arching strategy to transform our utility to lower and non-emitting energy resources.

We are pleased to offer this opportunity to potentially partner with CPS Energy, the electric and natural gas utility provider to the 7th largest city in the United States. Our **FlexPOWER** Bundle is critical to our community as it will enhance our power generation and delivery models in light of the exciting technology developments we have experienced in recent years, with the ultimate goal of transitioning our aging power generation capacity in San Antonio and Bexar County, Texas.

Per our RFI packet, Respondents should submit information describing power and/or demand side options and contracting solutions. CPS Energy requests these responses for information and planning purposes, related to procurement of energy and capacity from new and innovative power supply solutions. Our deadline for responses is August 31, 2020, which is included in the milestone schedule within the RFI packet that is available on the link <https://www.cpsenergy.com/flexrfi>

For any questions specific to the Request for Information packet, please send an email to supplychain@cpsenergy.com

We take this opportunity to thank you in advance for your consideration of this Request for Information.

Sincerely,

A handwritten signature in black ink that reads "Frank".
