Informational Update

NEW ENERGY PRODUCT OPPORTUNITY FOR CPS ENERGY

Renewable Natural Gas (RNG), or biogas upgraded to biomethane, is:

- a pipeline-quality gas
- fully interchangeable with conventional (fossil) natural gas
- essentially biogas that has been processed to purity standards

Graphic adapted from U.S. Gain presentation on Wisconsin Clean Cities website (www.wicleancities.org).

RNG PROJECT OFFERS VALUABLE POTENTIAL

- Aligns with ***CPS Energy FlexPath*** strategies
- Provides environmentally friendly new energy solution for CPS Energy customers in the transportation industry
- Decarbonizes the gas pipe
- Economic potential associated with RNG through the support of EPA-administered Renewable Fuel Standard requirements
- Leverages use of existing gas supply/distribution infrastructure
 - minimal investment required

Thank You
